

HISTORIA SOCIAL: LA MUERTE

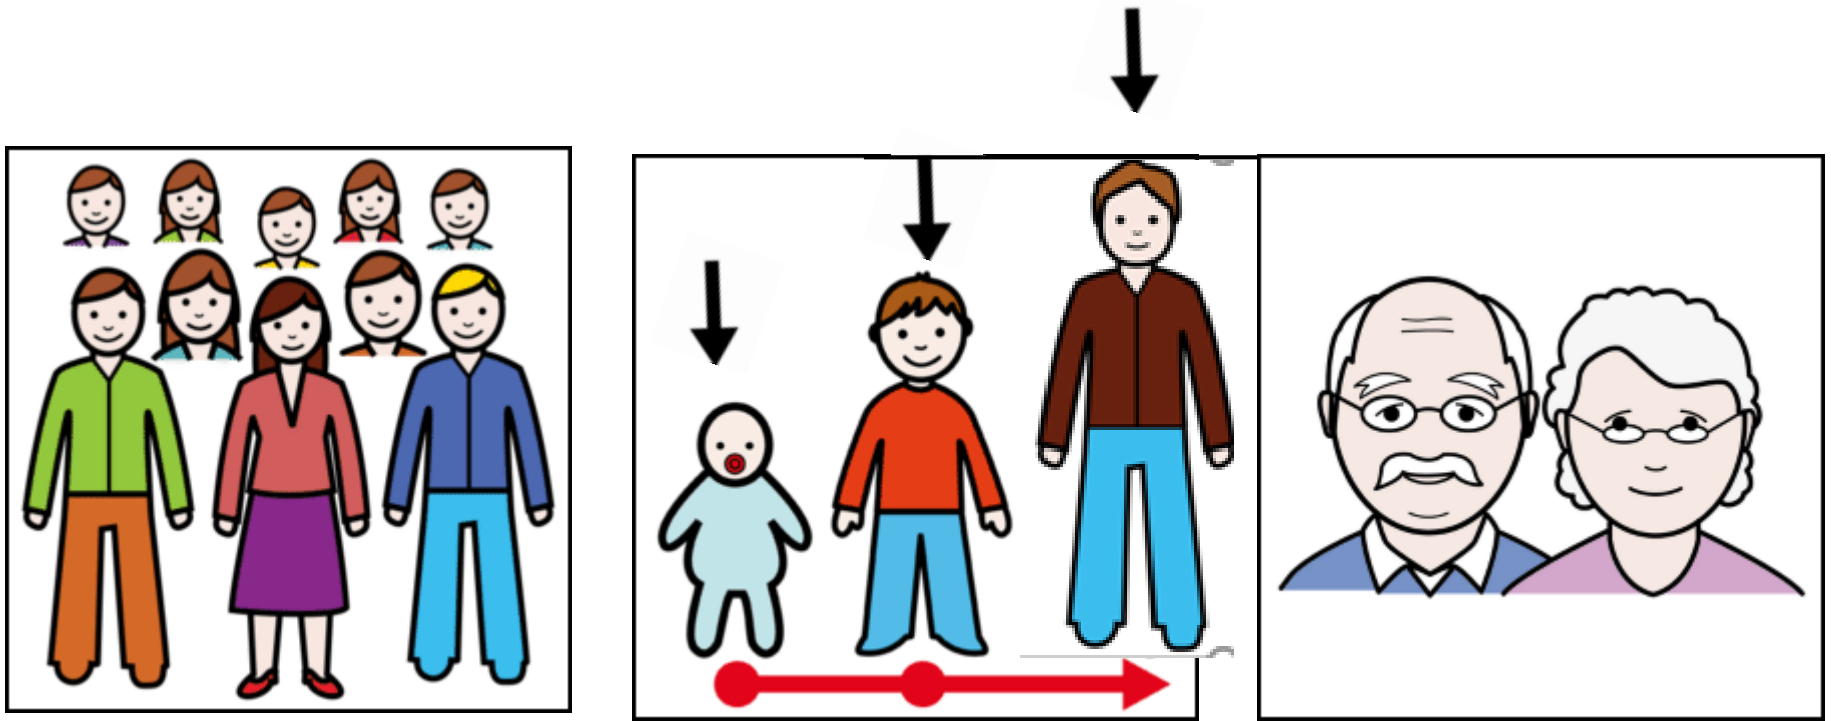

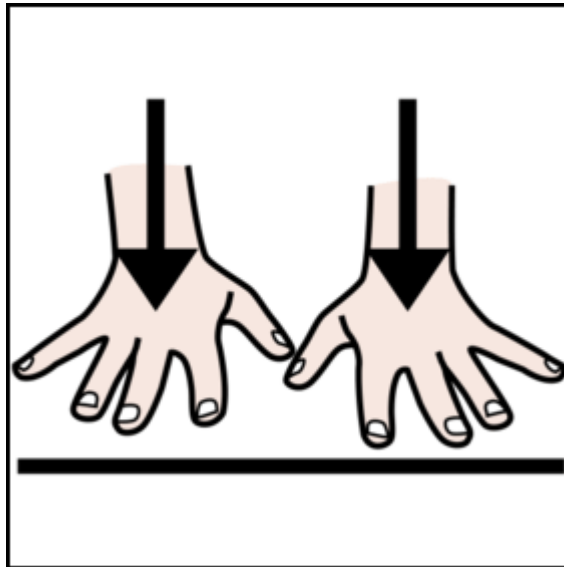

Las personas nacemos, crecemos
y nos desarrollamos.

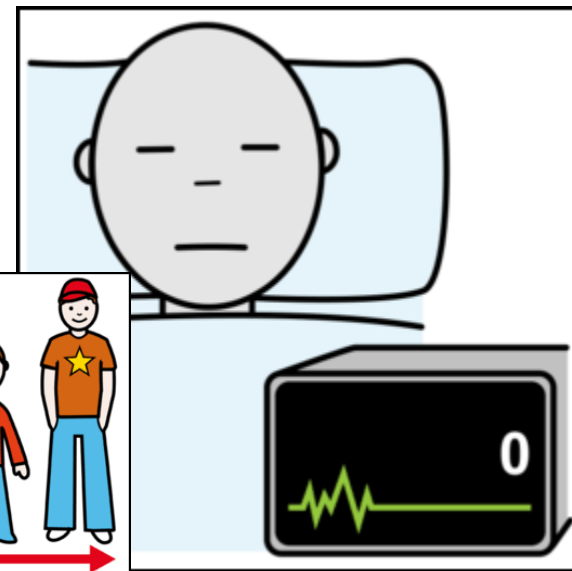

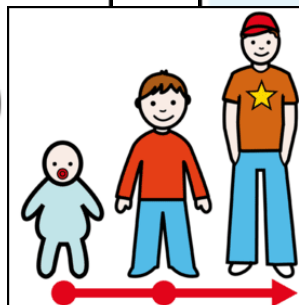

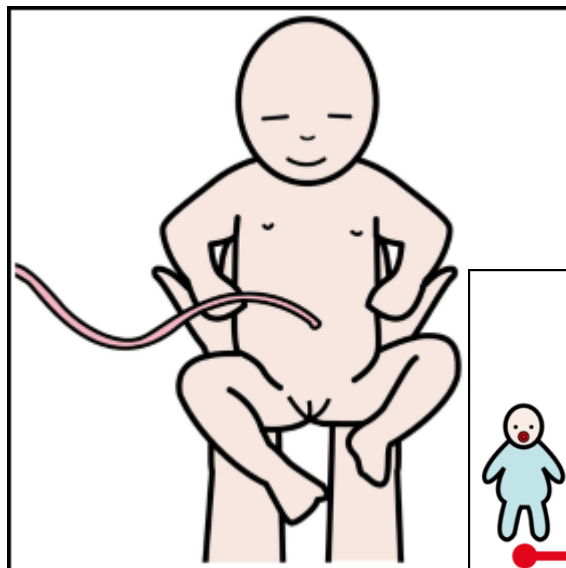

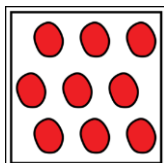

Las personas nacemos y morimos.

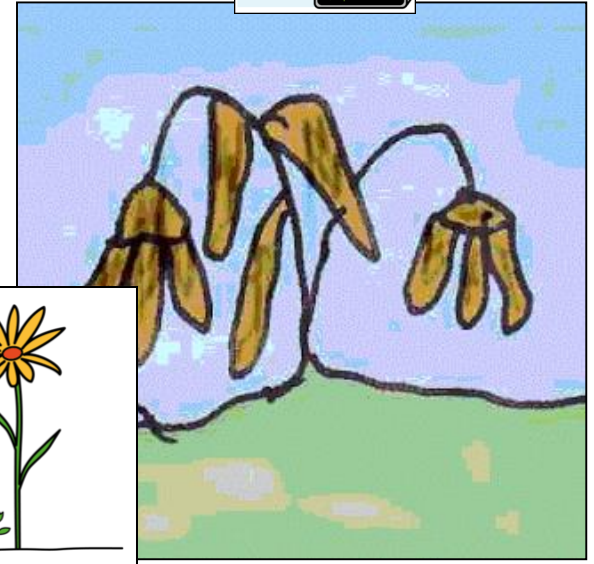

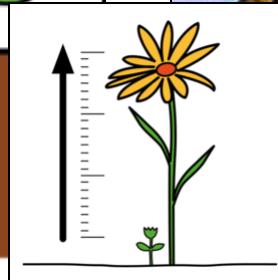

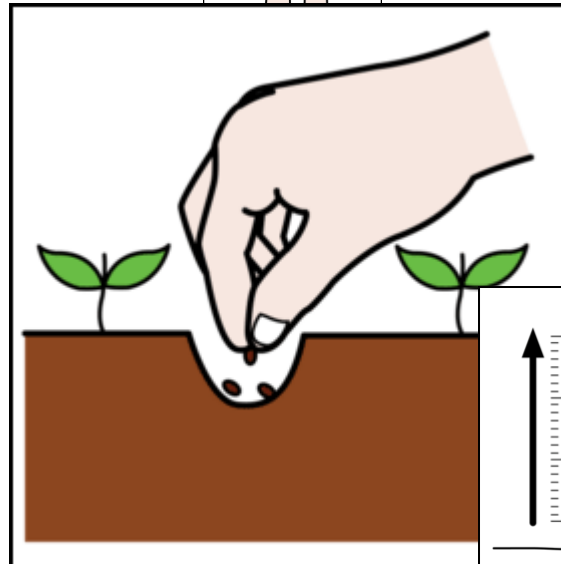

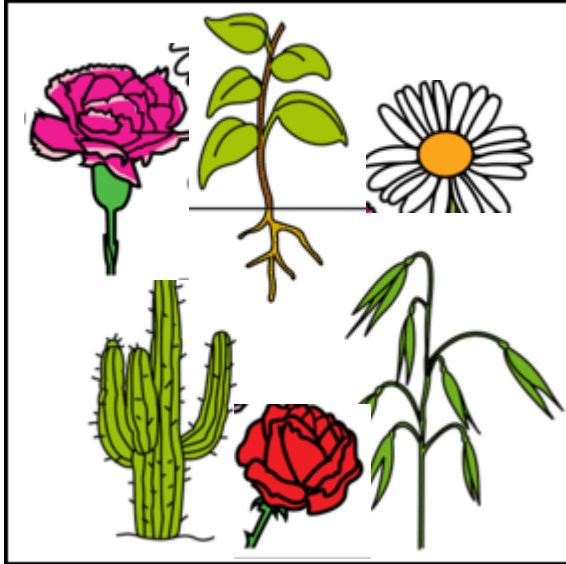

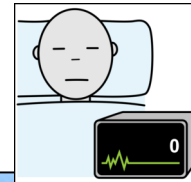

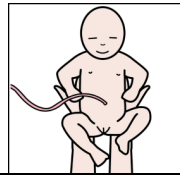

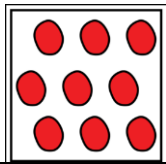

Las personas primero somos niños, luego jóvenes, luego adultos y luego abuelitos.

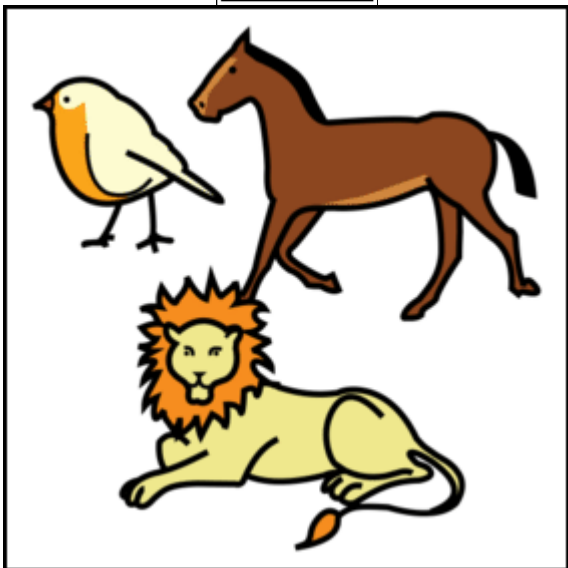

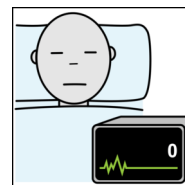

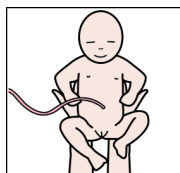

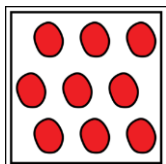

Las personas somos seres vivos.

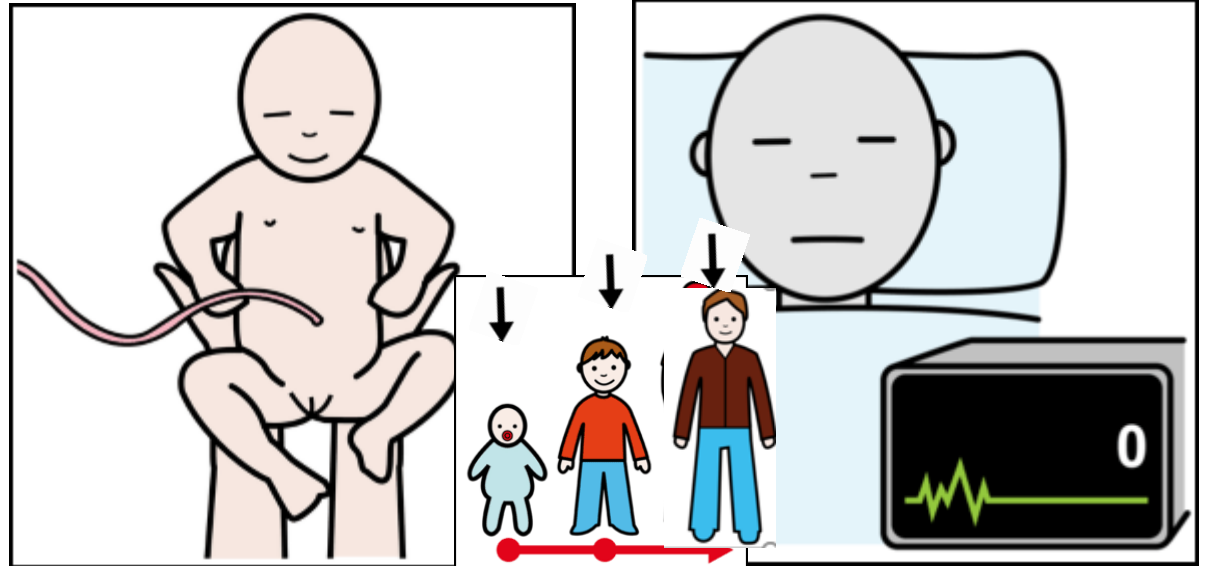

Todos los seres vivos nacen,
se desarrollan y mueren.

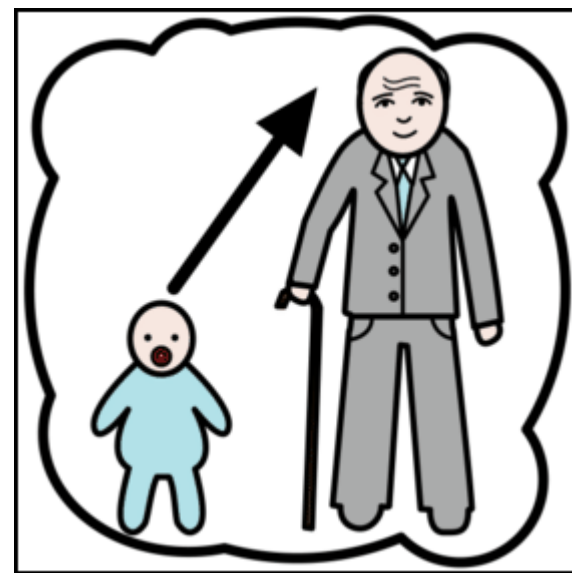

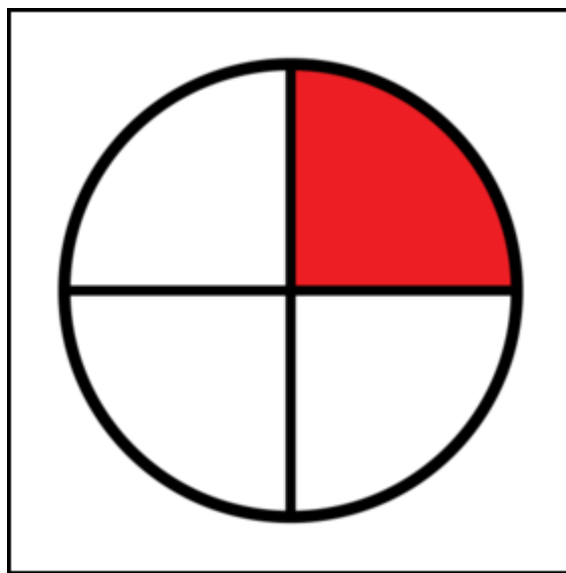

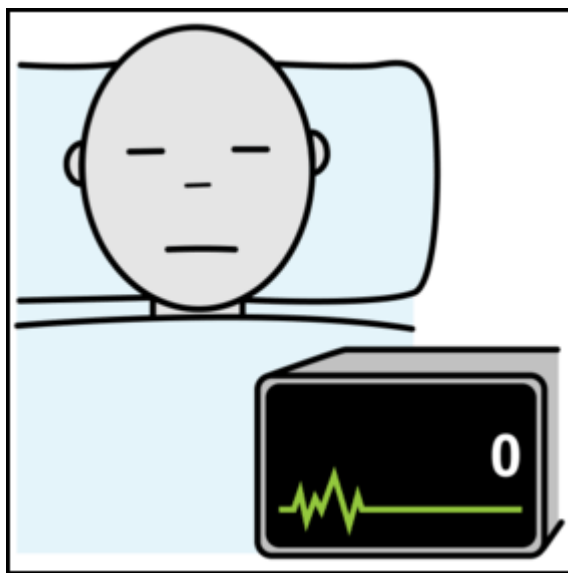

Todas las plantas y flores nacen,
se desarrollan y mueren.

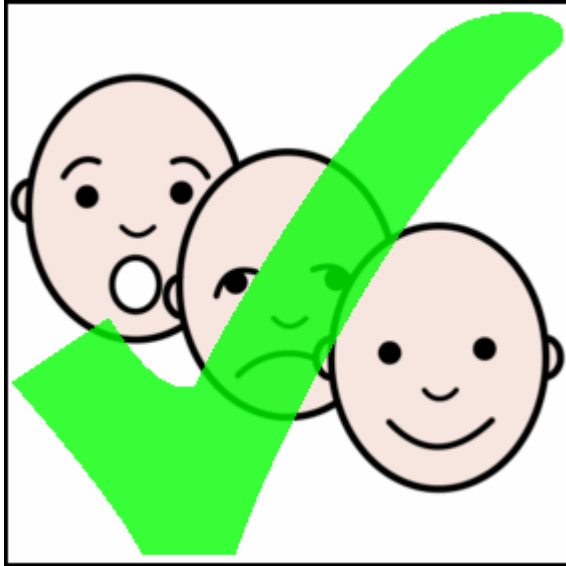

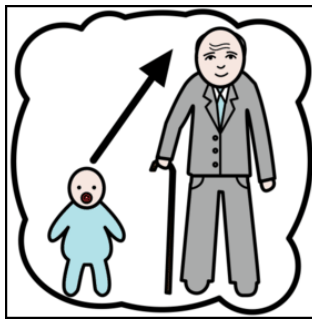

Todos los animales nacen,
se desarrollan y mueren.

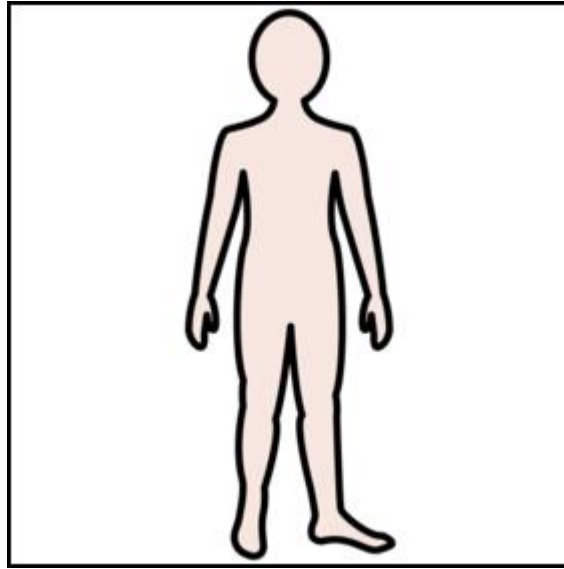

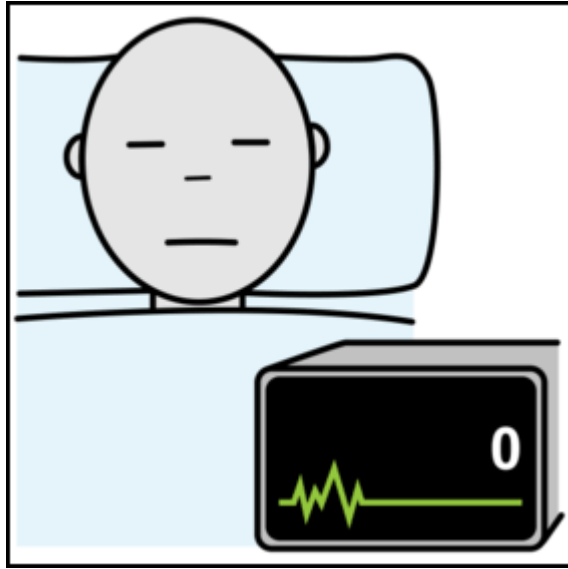

Las personas nacemos, nos desarrollamos y morimos.

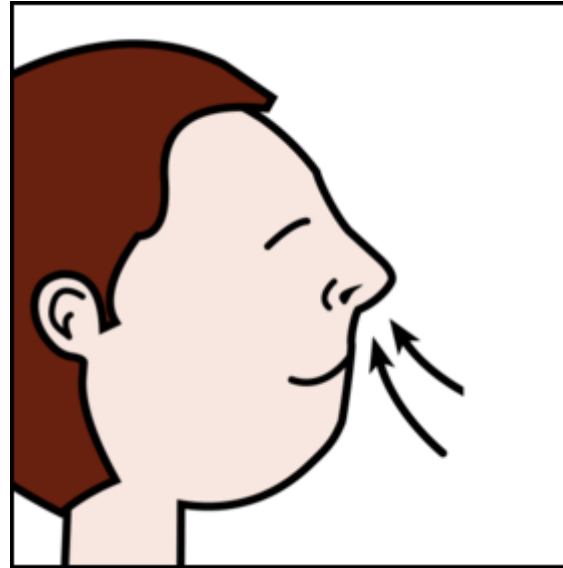

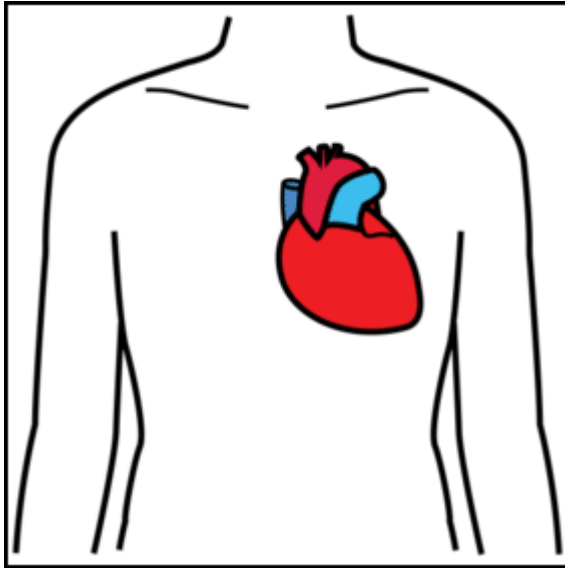

La muerte es una parte de la vida.

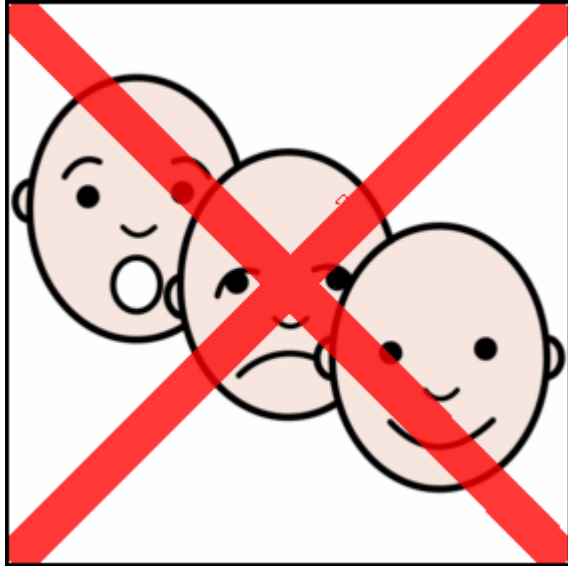

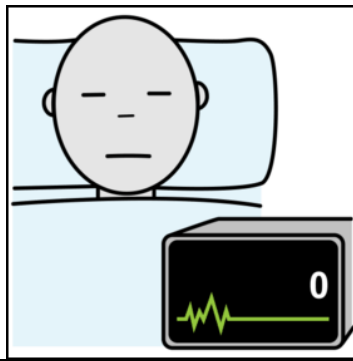

Si la persona está viva, siente
y tiene frío y calor.

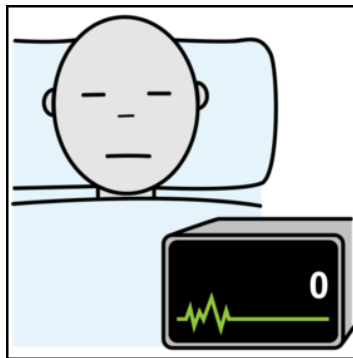

Cuando una persona muere, su cuerpo se para.

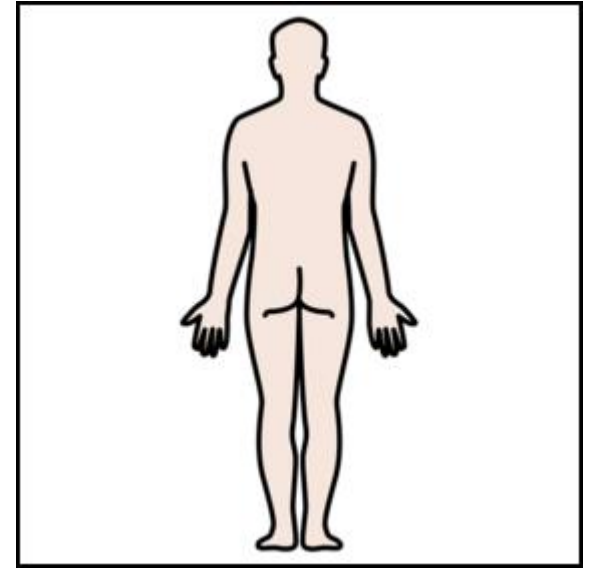

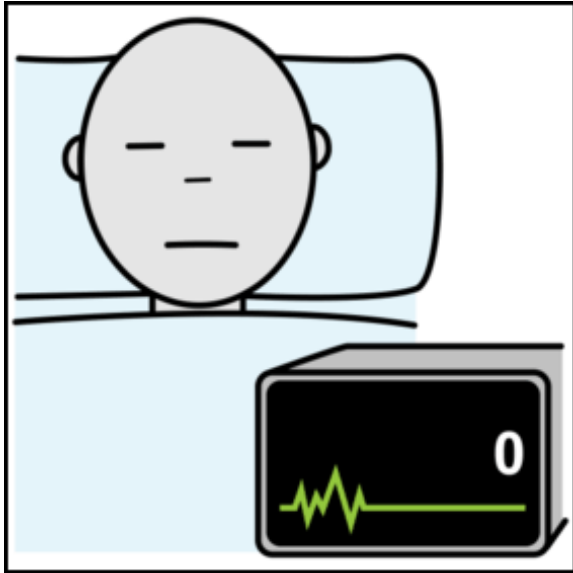

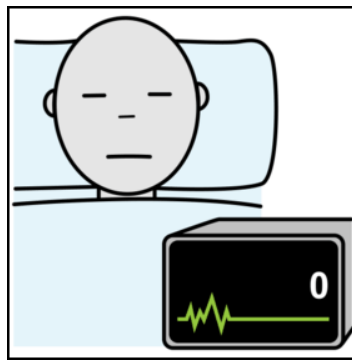

El corazón y las respiración se paran.

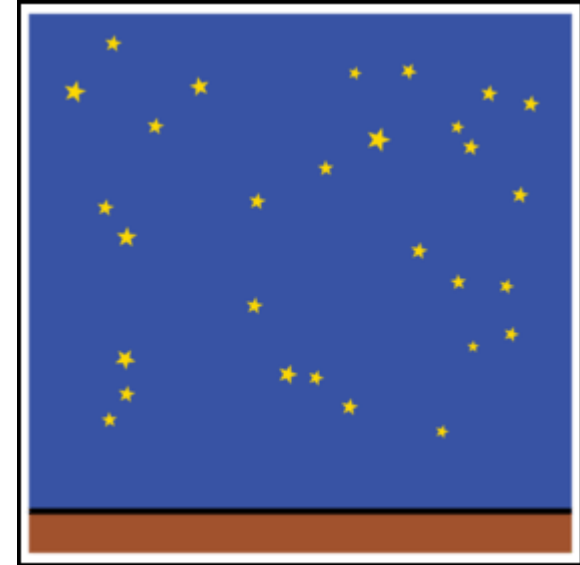

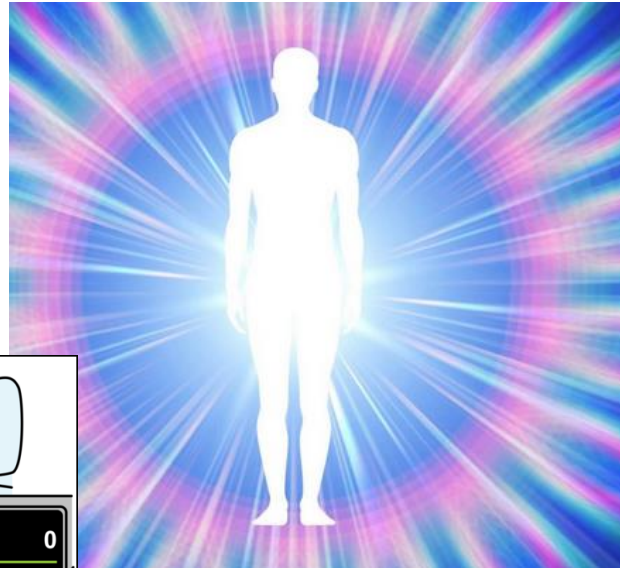

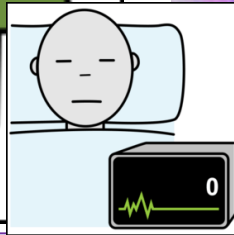

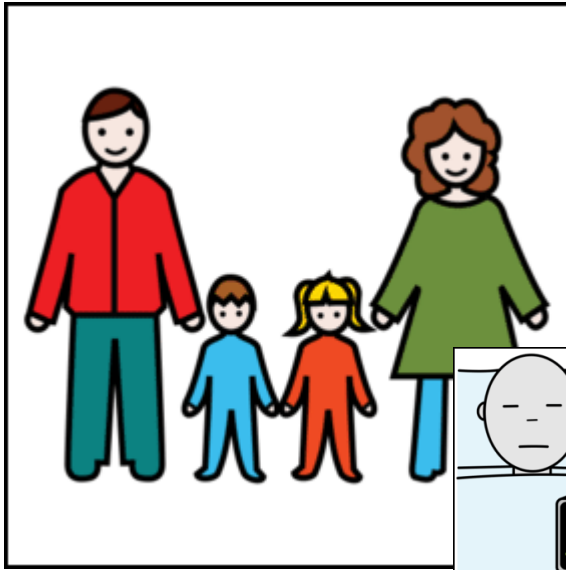

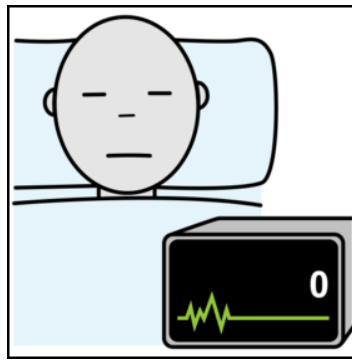

Si la persona se muere, ya no siente nada. No tiene frío ni calor.

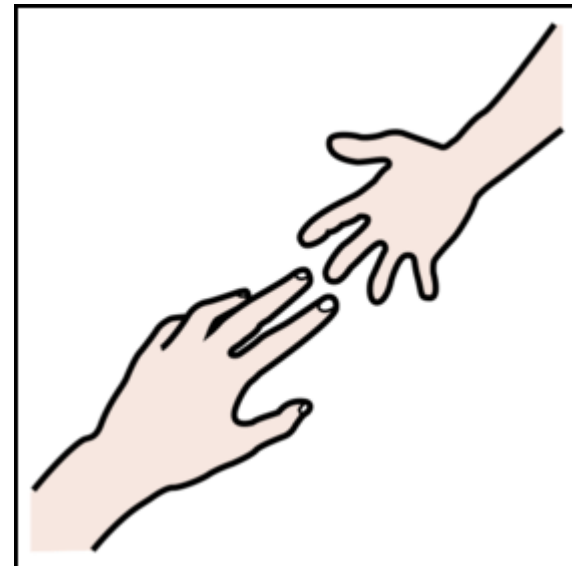

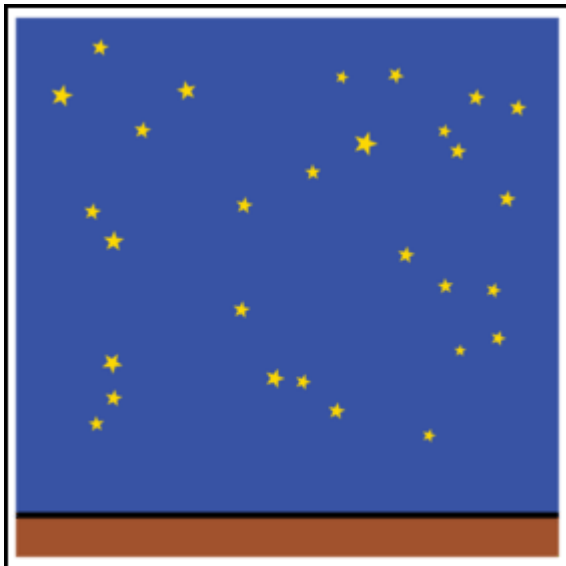

Si la persona se muere,
ya no siente dolor, ni le pica, ni está triste

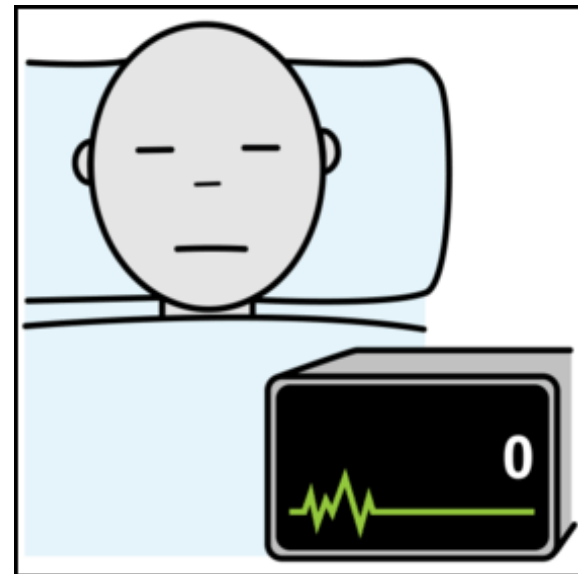

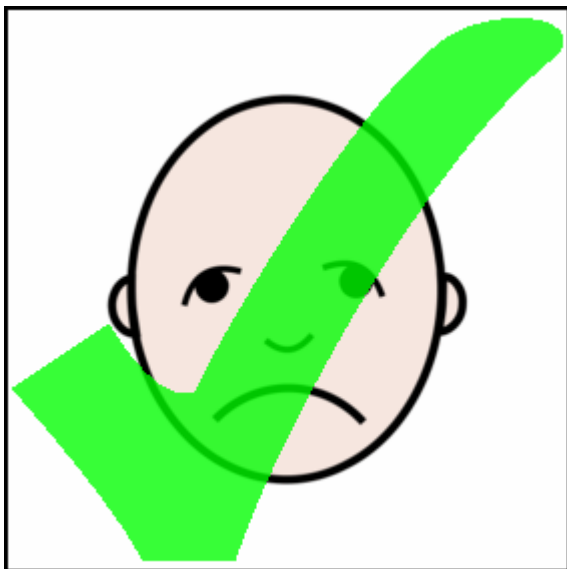

Cuando alguien se muere,
en la tierra se queda solo el cuerpo

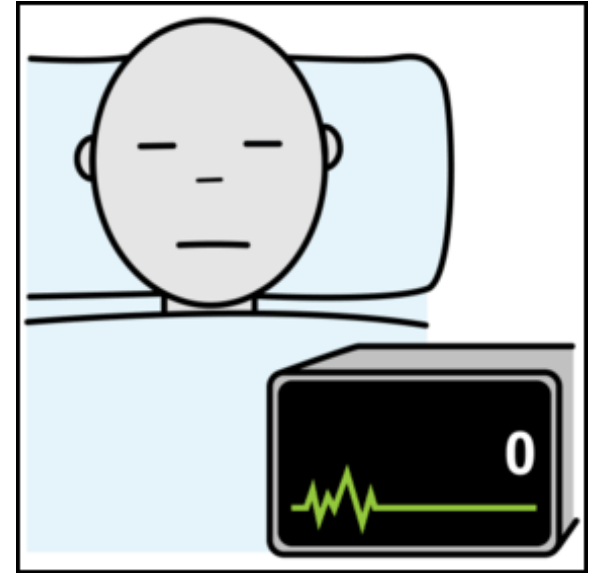

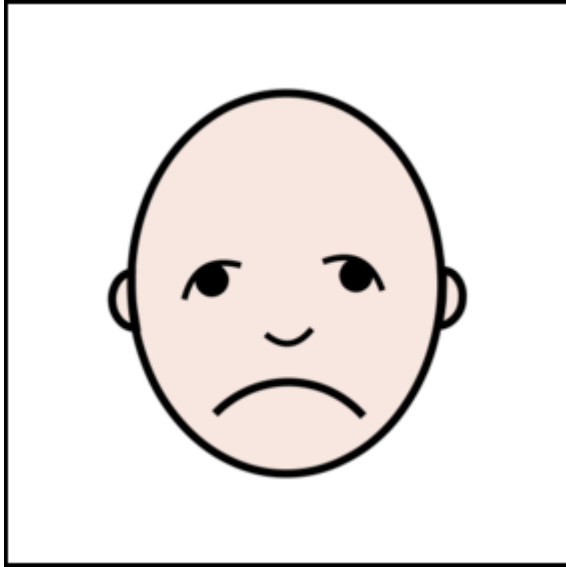

Nuestra familia piensa que cuando
te mueres tu alma va al cielo

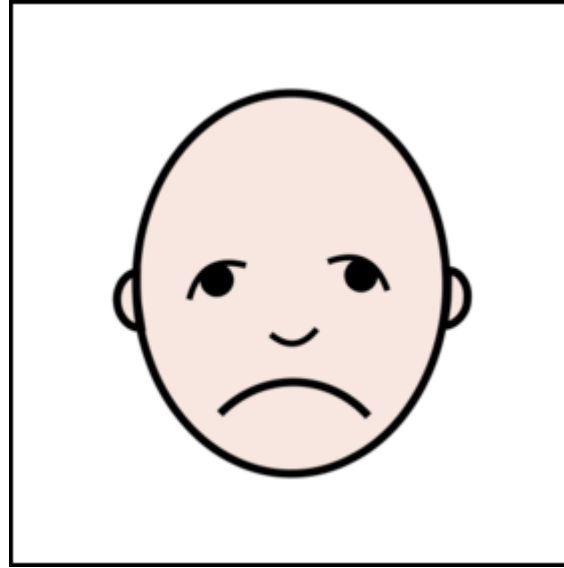

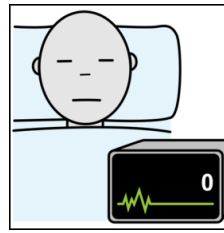

Y desde el cielo su alma nos cuida

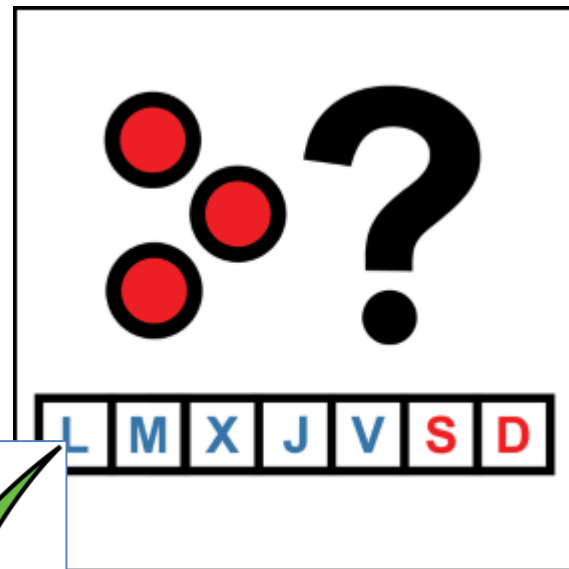

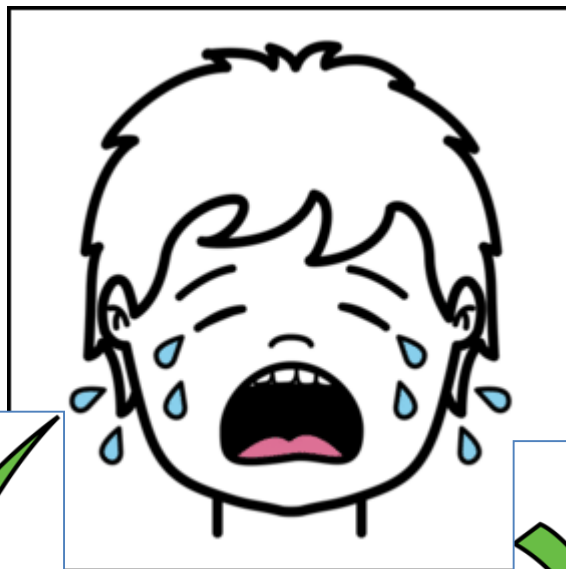

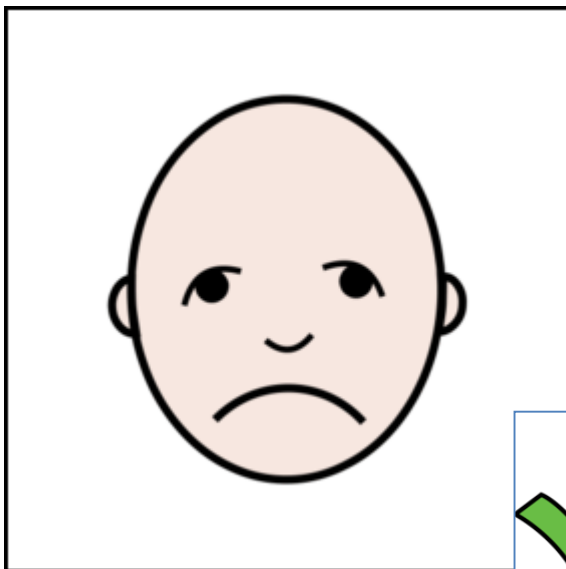

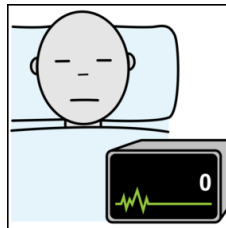

Estar triste es normal. Estamos tristes porque echamos de menos a la persona que se ha muerto.

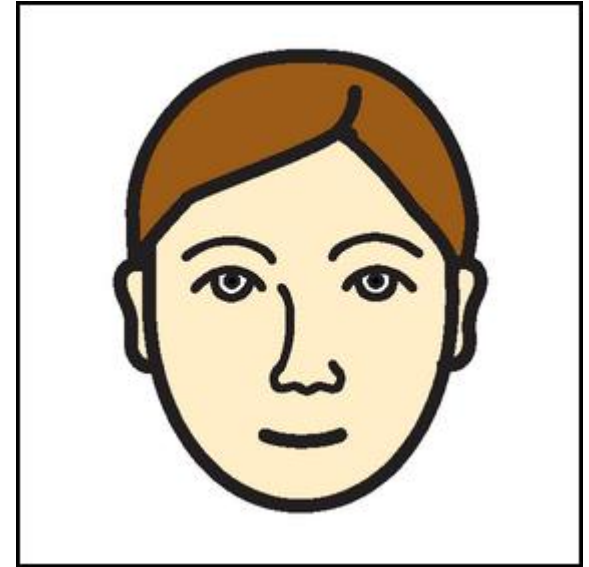

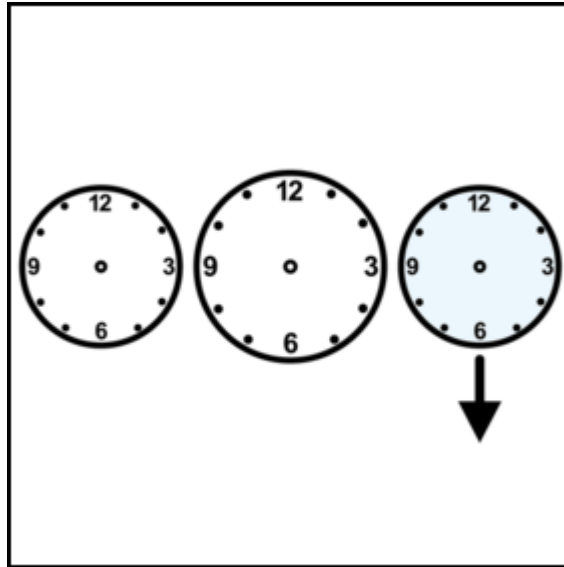

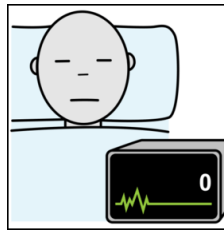

También nos sentimos tristes porque ya no podemos hablar con la persona que se ha muerto.

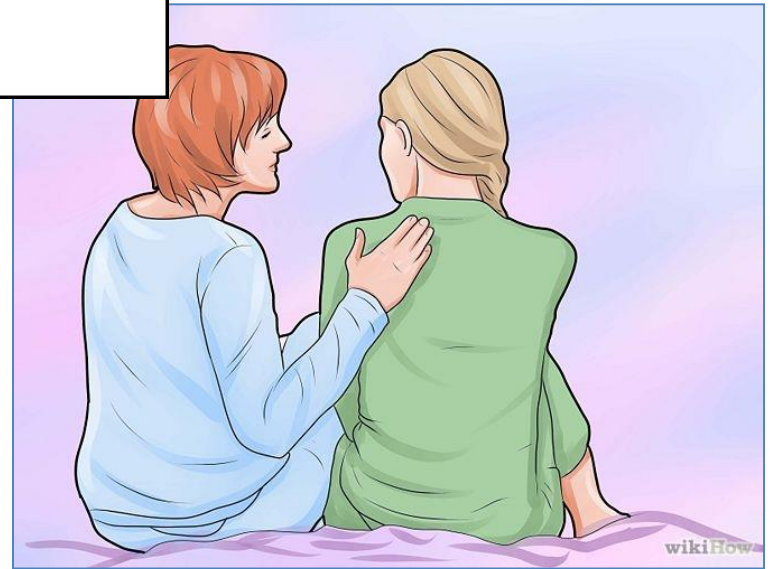

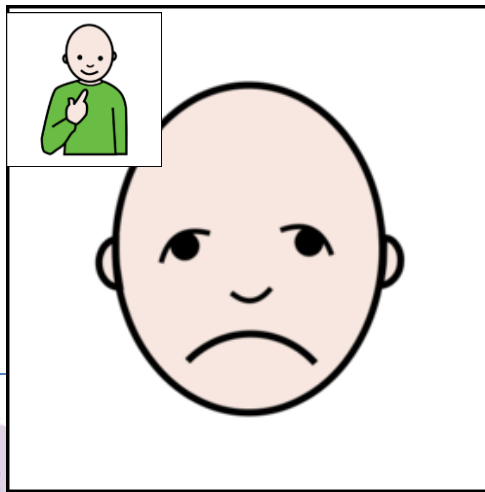

Cuando las personas están tristes,
a veces lloran.

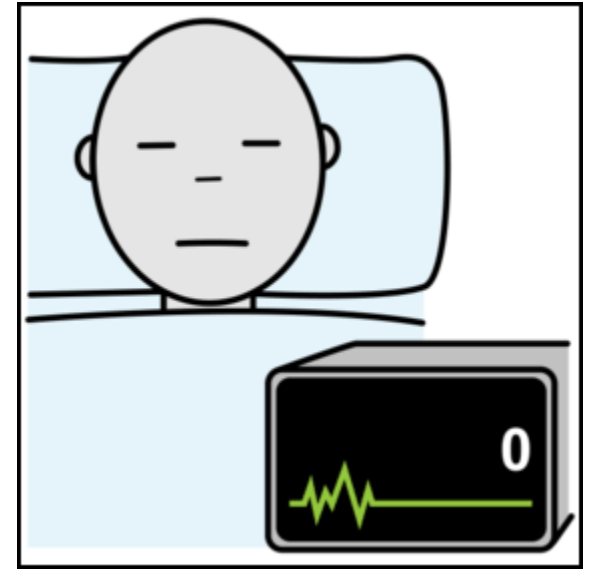

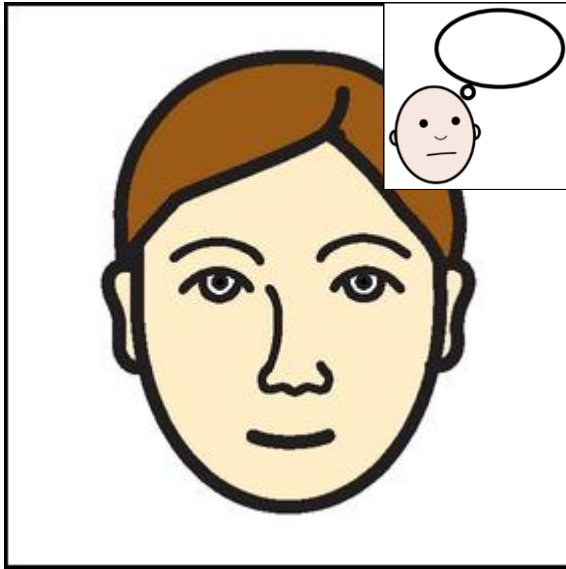

Quizá lllore y esté triste varios días.
Eso está bien.

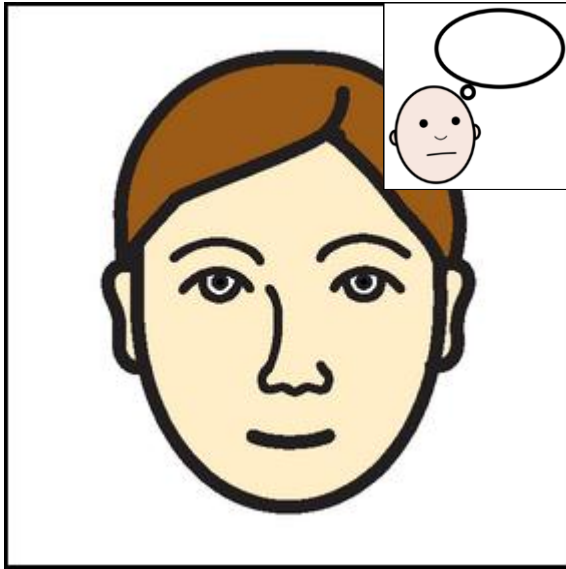

Llorar está bien y después de llorar quizá
te sientes un poco mejor.

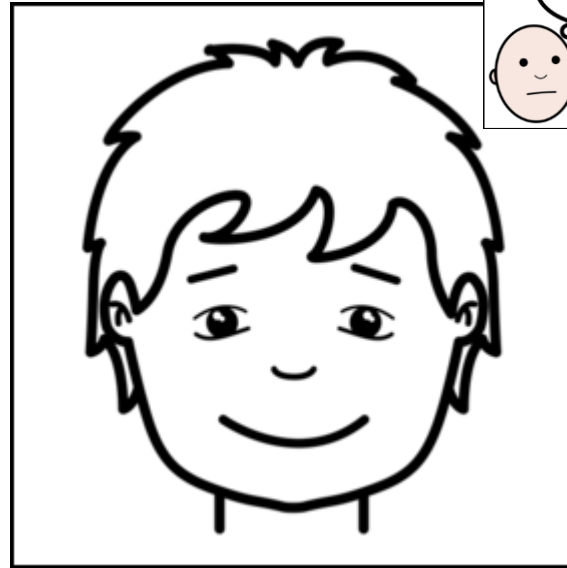

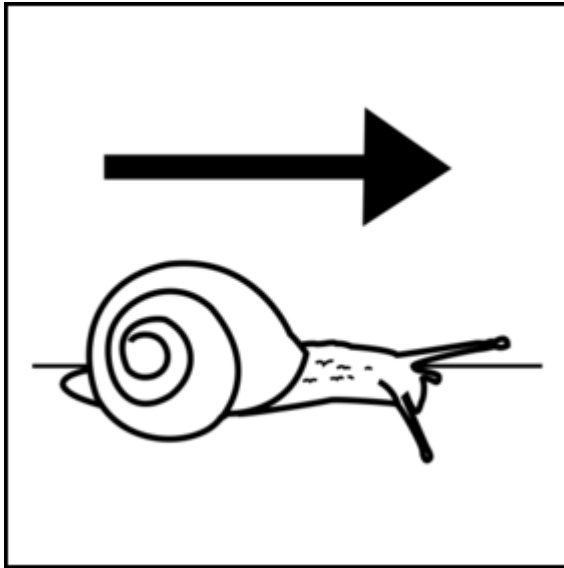

Si yo estoy triste, otra persona me puede consolar dándome un abrazo

Para estar mejor, también puedo pensar en cosas bonitas de esa persona muerta.

Puedo recordar las cosas que hacíamos juntos y los ratos divertidos.

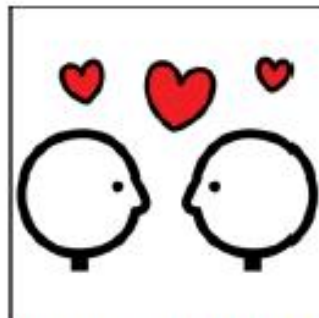

Poco a poco me sentiré mejor y sonreiré
cuando me acuerde de esa persona
